VIRTUAL EXPERIENCE CENTER

The Flushing Meadows park has enriched past; diverse recreational present combining art, science, zoo, and stadium; and will inspire future through the proposed Virtual Experience Center. It will not only connect the past and future experiences but will also serve as an open repository for future virtual experimentation. Tent for Tomorrow, a multi-user virtual interactive experience will attract every age to witness the 1964's Worlds Fair as well simultaneously allow 2064's cities with the user-specific environment. The entire pavilion can be digitally restored to original state from glass roof to the floor ready to interact. The program will include the central tent of tomorrow as green virtual experience dome, physical exhibits with digital interaction, educational and arcade game arena, retail, and tower top as virtual environment dining.
